Minutes of my experiences

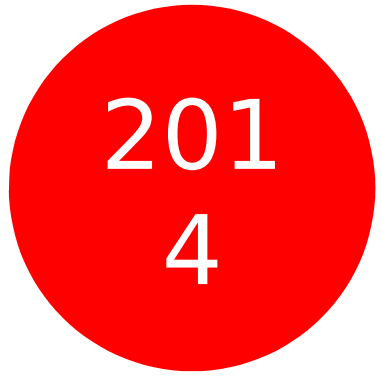
Working as Telco Designer

I will not code...

Starting a Company

I should learn how to code...

Startup Life



I should code...

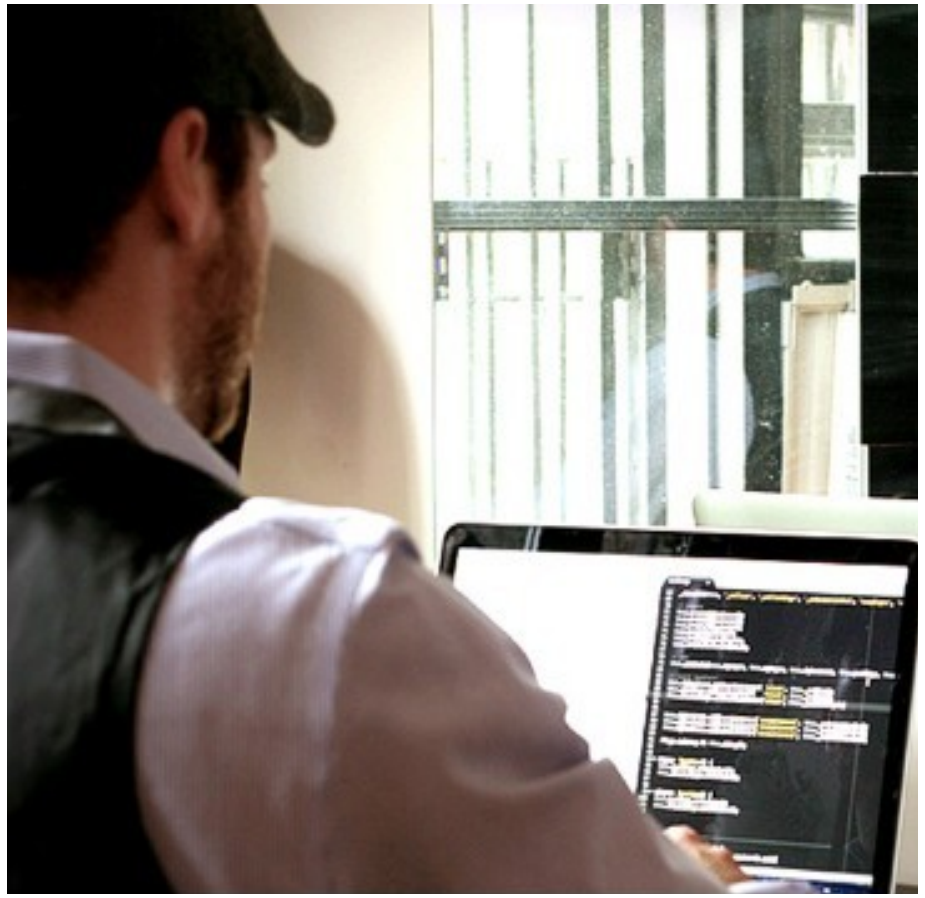
Programming as a Designer

And how it affects my life & business

Asyraf Duyshart, Project Director at Gapcer

For years coding has been confined to engineer, programmer & developer.

So why we having this discussion right now?



Because not anymore.

Growth of Digital Era

Code is the heart of digital business

Internet is rapidly growing

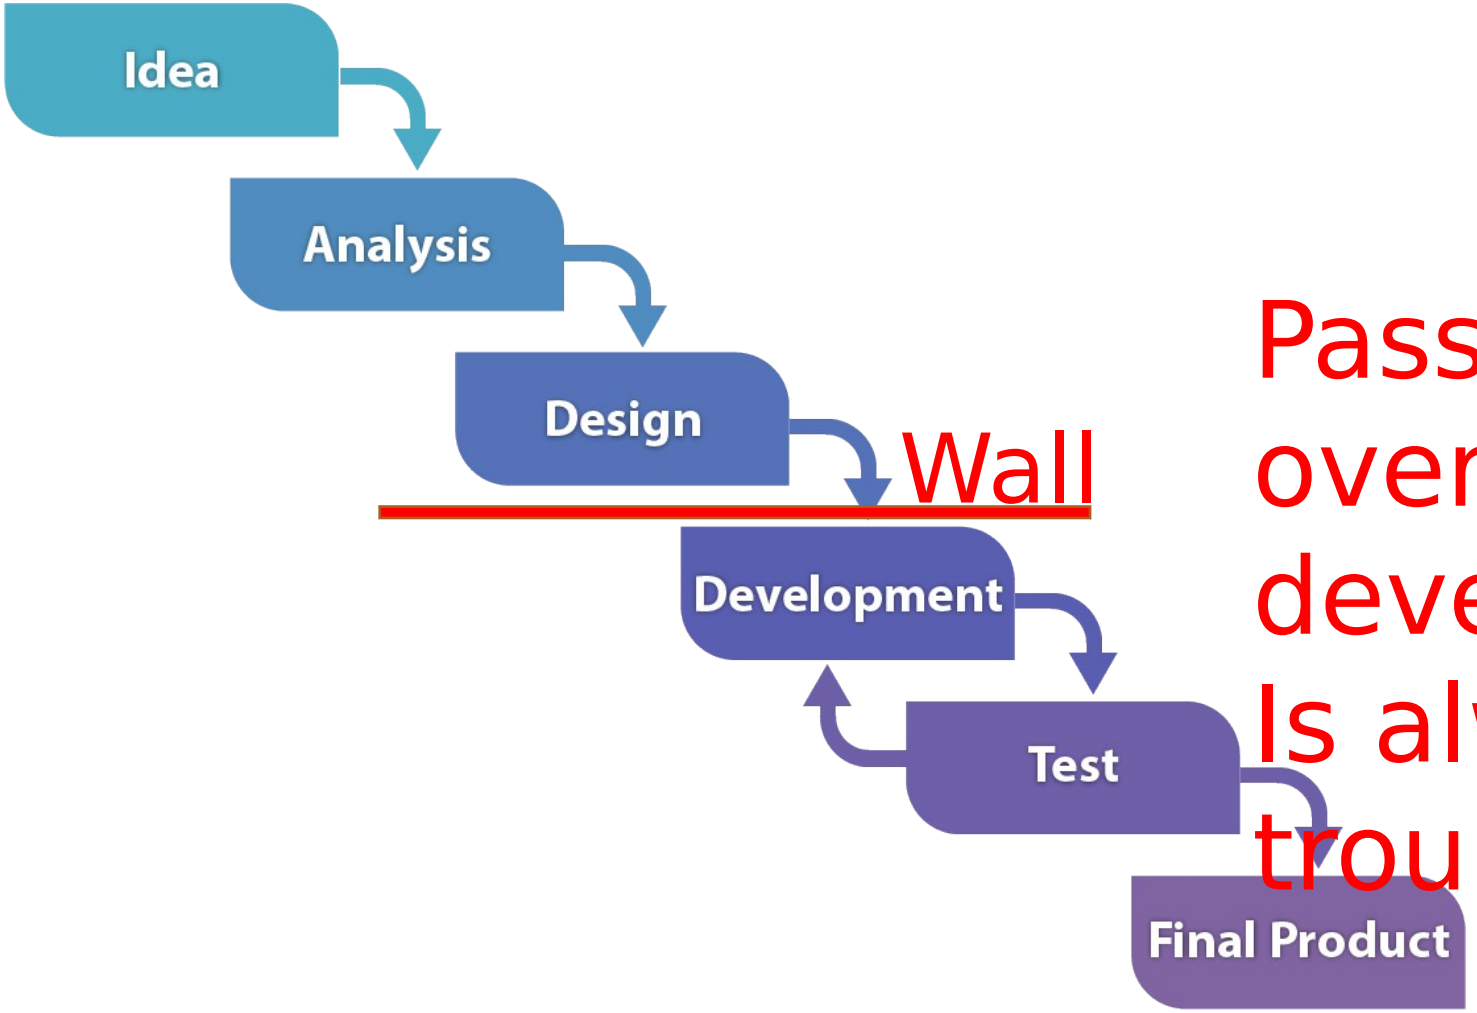
Code became easier to learn

Programming is for everyone

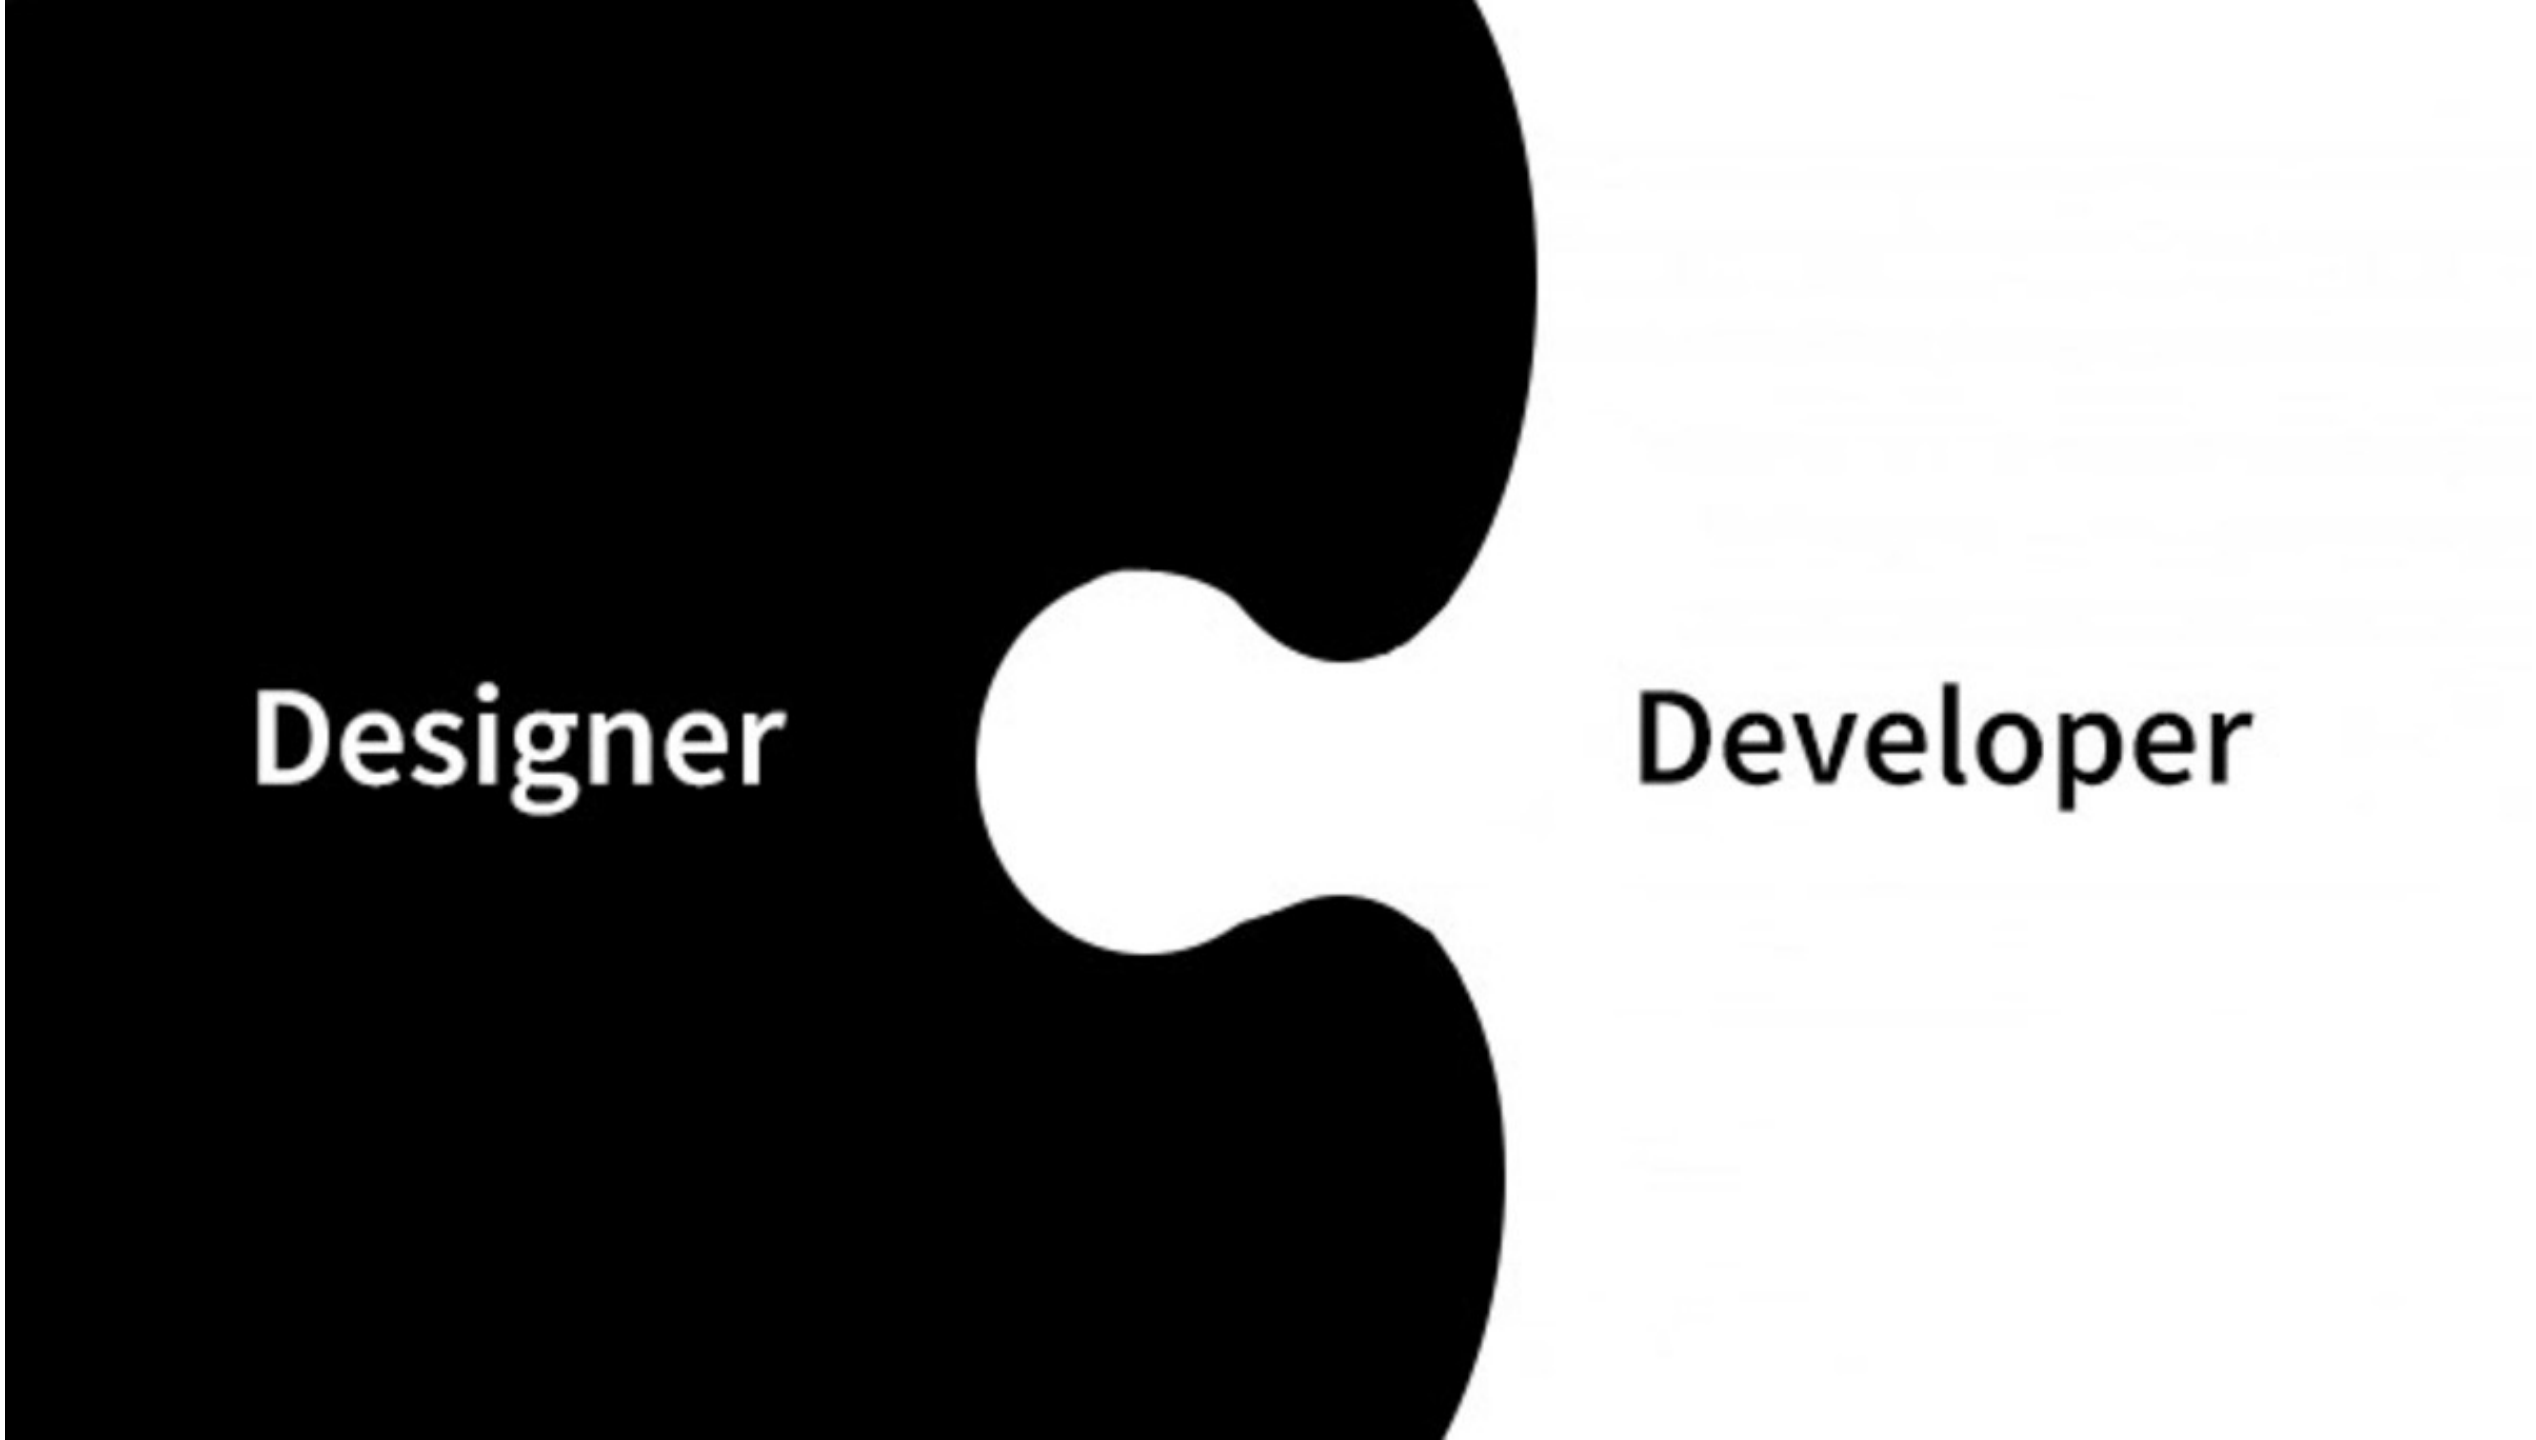
As a designers

Why should we?

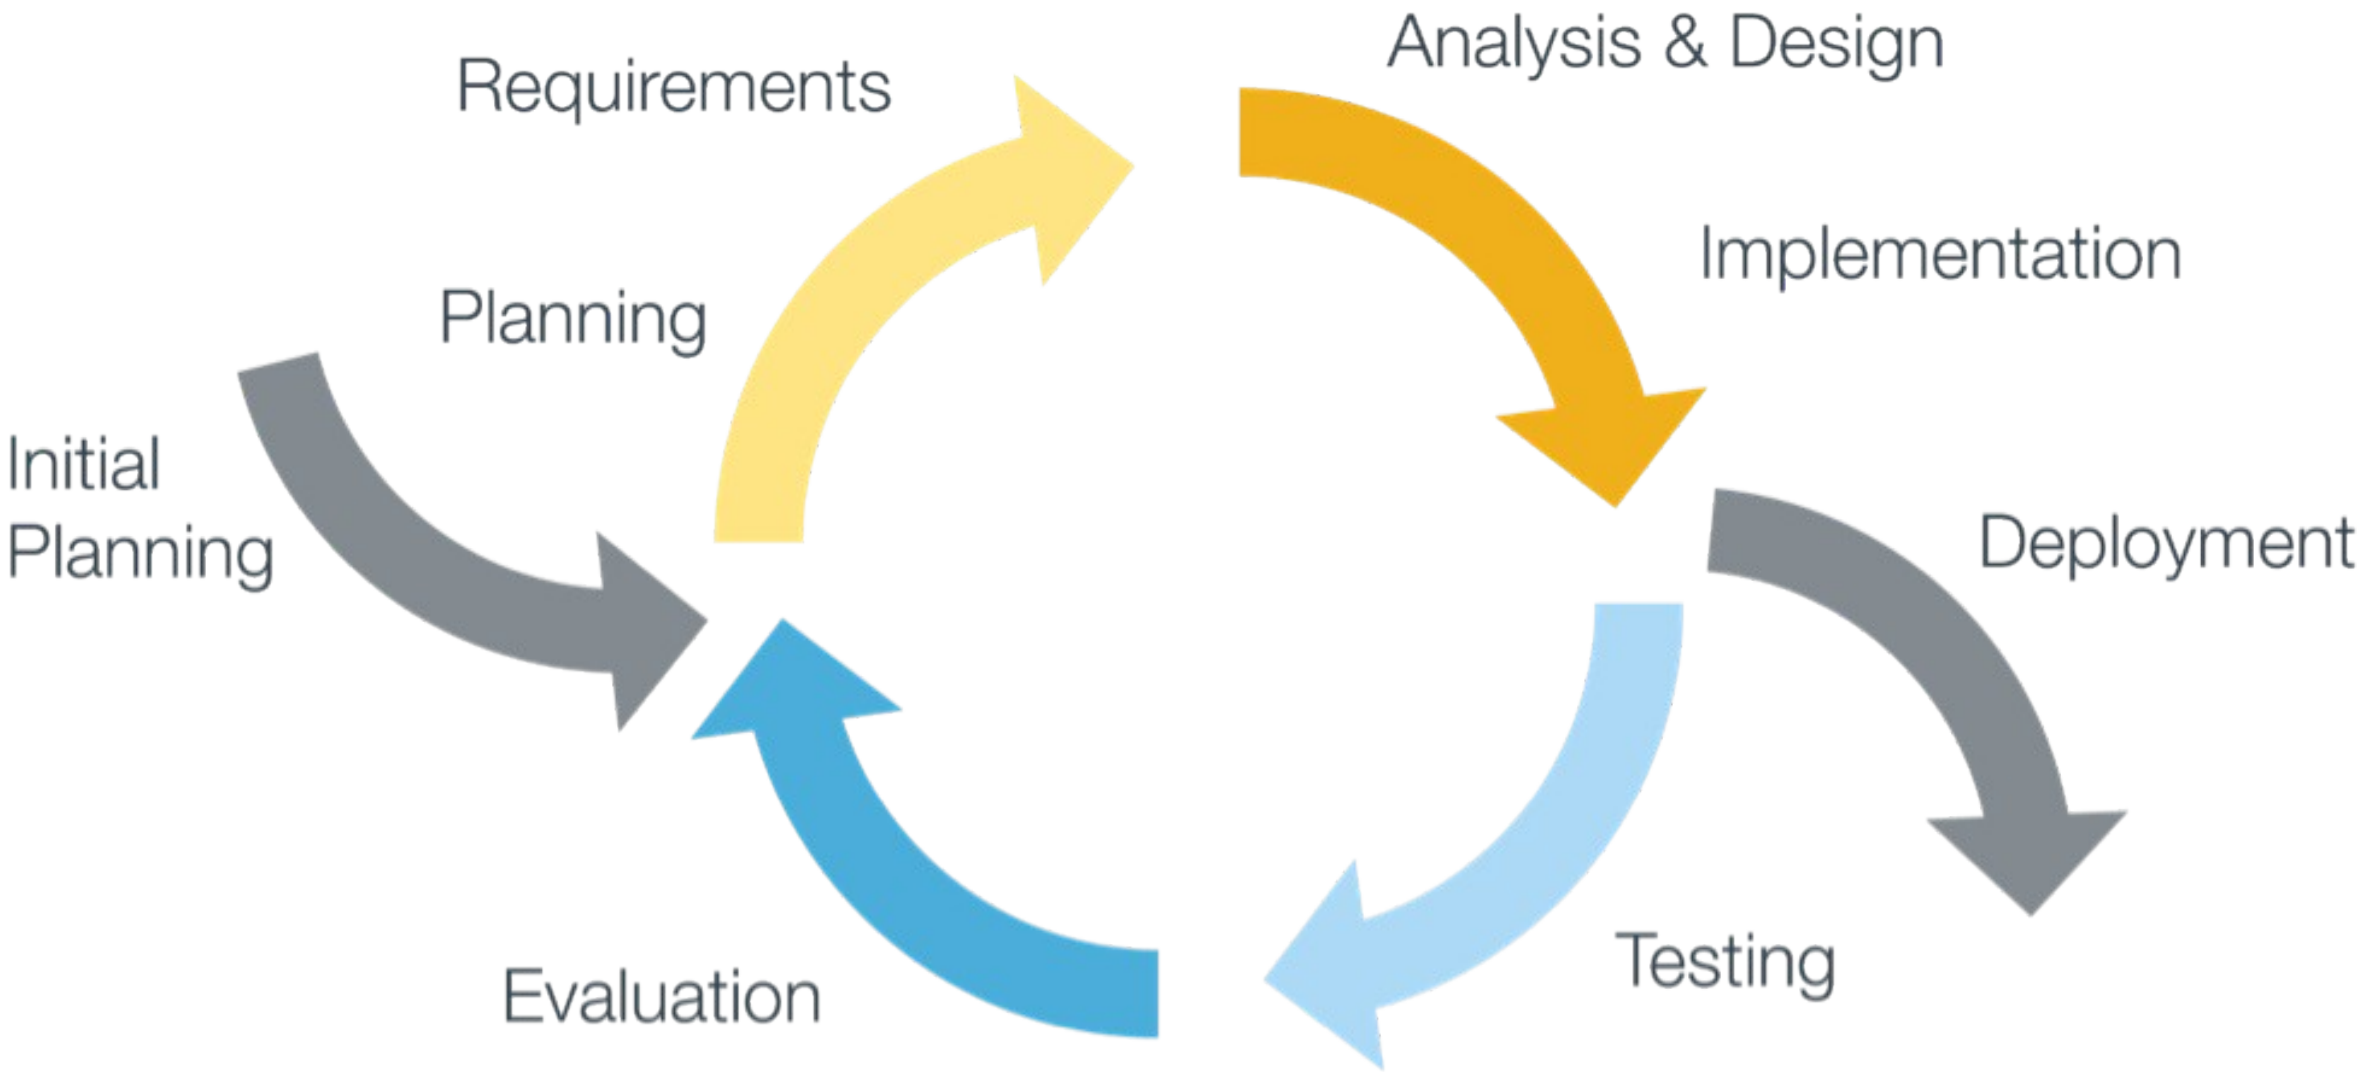
When building a product



Passing design over a wall of developers Is always a trouble



Designer
Developer



Requirements
Analysis & Design
Planning
Implementation
Initial
Planning
Deployment
Evaluation
Testing

Learning to code does more than make me a more proficient Designer. It allows me move beyond the limited scope of paper and digital wireframes into the realm of...

Rapid Prototyping

What’s the benefits for startup?

Fast Iteration

Knowing how to code greatly improves both **my ability to communicate** and the degree to which **i can contribute and participate**.

Summary

Programmin
g is for
everyone

Programming help
designer
communicate well
with developers

Programming for
designer help startup
to built more fast &
effective product
